Location: Berlin, Germany (Chancenkarte visa valid until 19/12/2026)

ABOUT ME

Industrial Engineer and MBA with a decade of experience in the utilities and insurance sectors, working on portfolios and customer bases over 4 million accounts. Uses Python, SQL, SPSS Modeler, Snowflake, AWS and Power BI to structure data flows, build risk and segmentation models, and design dashboards. Turns raw data into insights and explains the numbers in plain language. Native Spanish speaker with C1 English and A1 German.

EDUCATION & TRAINING

Executive MBA in Strategic Business Management

Formato Educativo

[09/02/2022 – 30/10/2022]

50 credits awarded by Formato Educativo Business School with UEMC and Gadex as participating institutions. Diploma issued in Madrid on 15 December 2022 and apostilled in Spain under the Hague Convention.

Bachelor of Science in Industrial Engineering

Universidad del Norte

[29/01/2009 – 06/03/2015]

Ten-semester degree in process design, operations research and production management, closed with a 256-hour industrial placement and a final research project, both graded above the cumulative average.

CERTIFICATIONS

Wirtschaftsingenieur

ZAB Kultusministerkonferenz

[22/08/2025]

Statement of Comparability (Zeugnisbewertung) Ref. LN2025/51573-1. The Industrial Engineering degree is assessed as equal to a German higher education degree, between Bachelor's and Master's level.

Data Science, Graduated with Honors

Correlation One

[16/07/2022]

375 hours. Built and tested machine learning models for practical business cases, from EDA to model building and dashboards

Business Intelligence

Pontificia Universidad Javeriana

[20/09/2023]

117 hours. Data governance, KPIs, Clustering, predictive modeling, recommendation systems.

Power BI

Pontificia Universidad Javeriana

[26/09/2020]

40 hours. Data modeling, DAX and Power Query.

WORK EXPERIENCE

Insurance Data Analyst

Independent Practitioner

[24/06/2025 – Current]

Validated and standardized millions of policy and claim records against actuarial rules, raising data quality from 82% to 97% and removing 5 days of manual checking every month. Ran exploratory data analysis (EDA) in Python and SQL over 5 years of history to surface pricing gaps, and early risk signals.

Integrations Engineer

Independent Practitioner

[06/02/2023 – 17/05/2025]

Designed inbound and outbound data architectures that move client records from AWS S3, Google Cloud Storage, SFTP, REST APIs and web scraping into a central Snowflake environment. Parsed 27 source feeds in Python, holding uniform file structures for client financial reconciliations. Refactored core ETL query logic and managed feasibility reviews through Jira and Monday.com.

Senior Professional in Distribution

Enel Colombia

[27/07/2022 – 26/12/2022]

Built risk models in Python for hundreds of distribution assets, producing health index scores and remaining useful life, estimates that moved maintenance from a fixed calendar to condition-based, avoiding \$90,000 USD in early replacements. Designed Power BI dashboards tracking the reliability indicators SAIDI and SAIFI.

Commercial Operational Management

Afinia EPM

[01/06/2019 – 10/08/2022]

Monitor and control commercial cycle operations. Built reporting models with SQL and BI that gave the commercial teams a daily work list, so decisions followed the current data instead of the previous month summary.

Customer Technical Assistance Analyst

Electricaribe

[01/08/2018 – 31/05/2019]

Planned budgets and ran variance analysis against historical cost data, measuring unit cost, utilization ratio and return on investment. Managed the contract and service level agreement (SLA) database for external suppliers and tracked KPIs across the vendor network.

Head of Default Management

Electricaribe

[10/04/2015 – 31/07/2018]

Applied K-means clustering to segment a portfolio of 900,000 accounts holding \$260,000 USD in overdue balances into 5 risk groups, directing collection effort to the 18% of clients that carried 63% of the debt. Led a team of 6 analysts, each owning one collection channel and its outsourced providers.
