WORK EXPERIENCE

Senior Software Assets Management

ENEL CODENSA | Bogota, Colombia | 07.2022 - 12.2022:

- Developed Python-based models for asset optimization, including failure prediction, health index scoring, and remaining useful life estimation.
- Executed data cleaning, integration, and validation from multiple operational systems to support modeling activities.
- Built structured analytical reports and dashboards to support risk assessment and investment decisions.

Operational Management of the Commercial Cycle

EPM AFINIA | Cartagena, Colombia | 06.2019 - 07.2022:

- Designed, implemented and monitored BI frameworks to evaluate operational and commercial performance.
- Extracted and analyzed large customer and operational datasets for reporting integrated by Python, SQL and BI tools.
- Identified anomalies, performance gaps, and improvement opportunities through statistical analysis and trend evaluation.
- Produced recurring analytical reports to guide operational strategy and decision-making.

Customer Technical Assistance Analyst

EPM AFINIA | Barranquilla, Colombia | 08.2018 - 05.2019:

- Conducted budget planning and variance analysis using historical data and quantitative methods.
- Monitored B2C commercial operations with performance metrics, quality indicators, and compliance criteria.
- Managed databases of suppliers contracts, agreements, and external service providers.
- Built operational reports to evaluate efficiency, costs, and deviations.

Head of Default Management

EPM AFINIA | Cartagena, Colombia | 04.2018 - 07.2018:

- Performed portfolio data analysis to generate compliance, recovery, and performance report.
- Detected irregularities and data anomalies through structured exploratory analyses.
- Tracked the effectiveness of default-management plans using statistical indicators.
- Designed dashboards to support corrective decision-making in income control and governance processes.
